George Kryukov

Python Developer | Backend Developer | API Development | Django Expert | Data Scraping | Database Management
Nicosia, Cyprus

Summary

As a motivated and detail-oriented Python Developer, I specialize in backend development, API design, and building scalable web applications. With hands-on experience in frameworks like Django and DRF, I have successfully delivered efficient, high-quality solutions across various projects. I am passionate about optimizing processes, working with data scraping techniques, and ensuring seamless user experiences.

Currently pursuing a degree in Artificial Intelligence, I am expanding my knowledge of advanced technologies and their real-world applications. This academic pursuit complements my practical experience and deepens my ability to solve complex problems using cutting-edge tools and techniques. My analytical mindset and technical expertise empower me to approach challenges creatively and deliver impactful results.

Collaboration is at the core of my professional approach. I thrive in fast-paced, dynamic environments where teamwork and adaptability are key to success. I am always eager to contribute to innovative projects that make a difference while continuing to grow and learn alongside talented professionals.

Let's connect to discuss opportunities, share insights, and collaborate on exciting tech-driven initiatives!

Experience

Project Activities

Python Backend Developer
October 2023 - May 2024 (8 months)
Moscow, Moscow City, Russia

Developed and maintained backend systems using Python, Django, and Django Rest Framework (DRF).

- # Designed and implemented 5+ RESTful APIs for Telegram Bots, enhancing automation processes by 20%.
- # Collaborated with 3 developers to deploy and maintain a scalable Todo application, serving over 100 active users.
- # Wrote clean, efficient, and reusable code to optimize system performance and ensure seamless integration with front-end services.
- # Participated in code reviews, providing constructive feedback to ensure best practices in software development.
- # Contributed to troubleshooting, debugging, and resolving issues in production environments to maintain application uptime.

Yandex Practicum

Back End Developer

October 2021 - June 2022 (9 months)

- # Developed and maintained robust backend systems using Django and Django Rest Framework (DRF).
- # Designed, built, and integrated RESTful APIs to ensure seamless communication between front-end and backend systems.
- # Led the development of both solo and collaborative web application projects, demonstrating strong problem-solving skills and the ability to work within a team.
- # Applied asynchronous programming techniques to optimize performance and enhance the scalability of applications.
- # Built data scraping solutions using Scrapy and BeautifulSoup to extract and aggregate data, including the "Asynchronous PEP Parser" project, which gathers and processes Python-related updates.
- # Collaborated with cross-functional teams to define requirements and ensure efficient, high-quality deliverables.
- # Contributed to code reviews and provided constructive feedback to peers to maintain code quality and adherence to best practices.
- # Utilized version control tools such as Git to manage code repositories and streamline collaboration within the development team.

Education

Final International University

Artificial Intelligence · (October 2023 - June 2027)
